PROFILE SUMMARY

Product Manager with a Computer Science background and experience in product development, market research, AI-enabled workflows, and cross-functional execution. Skilled in translating business and user needs into product requirements and driving initiatives from ideation through development, QA, and launch.

Brings a strong understanding of technology, generative AI with UX/UI to build scalable, user-centric products. Experienced in Agile/Scrum, stakeholder management, process optimization, and project execution.

SKILLS

Product: Product discovery, User research, Stakeholder Management, Market research, Agile/Scrum

Tech: MySQL, DBMS, HTML, CSS, JavaScript, Python, Django, RESTful APIs, C, C++, Pandas, Numpy

Tools: Jira, Confluence, Notion, Miro, Figma, Lovable, Postman, Git, Bitbucket, Dbeaver, MySQL Workbench

EXPERIENCE

Product Manager | Eduonix Learning

February 26 - Present

- Own the **end-to-end course product lifecycle**, from market research, demand analysis, and topic discovery to SME/instructor acquisition, course development, QA, launch, distribution, and lifecycle tracking.
- Manage a **2,000+ course pipeline** across ideation, drafting, QA, editing, publishing, and go-live, coordinating priorities and dependencies across product and external stakeholders.
- Implement **AI-enabled course production workflows** for research, drafting, script generation, audio/video production, and content delivery, scaling AI-assisted production across multiple course portfolios.
- Implemented **AI-enabled course production workflows** using ChatGPT, Gemini, NotebookLM, Notion AI, and ElevenLabs for research, content drafting, script generation, audio/video production, and course enhancement, scaling AI-assisted production across multiple course portfolios.
- Drive **course supply and catalog growth**, sourcing and onboarding **100+ instructors/SMEs** through LinkedIn, Email, and Upwork while evaluating instructor fit and aligning supply with high-demand course opportunities.
- Own the end-to-end **YouTube content pipeline**, from course selection and editorial coordination to video editing, SEO optimization, metadata, hashtags, master documentation, and final publishing to maximize content discoverability.
- **Lead SME/freelancer acquisition** and course development, including sourcing and evaluating instructors, conducting pitch discussions, selecting SMEs, coordinating course creation, reviewing deliverables, and taking courses through QA to go-live; train and mentor interns on product workflows and execution.

Software Development Intern | Tartan HQ

Gurugram, Haryana

Certificate

July 24 - April 25

- Developed and integrated RESTful APIs using **Django Rest Framework (DRF)**, ensuring seamless data exchange and system interoperability.
- Worked on **HRMS API Integrations** (7 custom, 2 international, and maintenance of Indian), conducting **data mapping**, payroll connections, authentication mechanisms, and API response optimization.
- Developed a **Monthly Salary Processing Utility**, automating salary data storage in the database.
- Designed and implemented **SDK UI Customization**, leveraging **AWS S3** and **Boto3** library.
- Implemented **Cron Jobs for Data Syncing**, configuring **sync frequencies** (every 24 hours, 7 days, and 28-30 days), and integrating **time zone management**.

"Detecting Chicken Distress Using Audio Sensors and Machine Learning Algorithms"

- Used **Convolutional Neural Networks (CNN)** such as **ResNet50** (78.91% accuracy in testing) and **InceptionV3** (93.13% accuracy in testing).
- Created a self-made deep learning model to lessen the number of parameters and increase accuracy using **log-Mel spectrograms** up to 97% in testing.

CASE STUDIES

Scaling Content Operations: A Capacity & Workflow Planning Case Study | [View](#)

- **Designed a 1,000-video content operations plan** covering capacity planning, resource allocation, workflow design, QA, and escalation minimizing SME dependency and support 3-month delivery.
- **Estimated delivery capacity, timelines, and resource costs** by modeling ~12–14 videos per intern per day and evaluating a 3-intern + 1 QA lead team structure, resulting in a projected **₹1.35L 3-month execution budget**.

ShopSmart: E-commerce UI/UX Case Study | [Figma](#) | [View](#)

- Designed a clean, intuitive e-commerce interface across Home, Product Listing, and Product Details pages, focusing on streamlined navigation, visual hierarchy, whitespace, and reduced cognitive clutter.
- Applied Figma Auto Layout, grids, smart guides, typography, spacing, and a consistent color system to create cohesive and responsive interface designs.

PROJECTS

Google Search Engine Clone (Web Development) | [View](#)

- Created a fully functional replica of Google's search functionalities using modern web technologies.
- Implemented user-friendly interfaces for search queries, image results, and advanced search options, mimicking the Google experience.

Vehicle Licence Plate Detection (Machine Learning) [View](#)

- Developed a vehicle license plate recognition system using **YOLOv5**, trained on a custom and augmented dataset to detect and classify diverse license plates, achieving 98% precision and recall.
- Built an **end-to-end recognition pipeline** integrating EasyOCR, TensorFlow, and Pillow for license plate detection, image processing, and character recognition, with potential applications in automated toll management and security systems.

EDUCATION

Jaypee University of Information Technology

B.Tech in Computer Science and Engineering CGPA: 8.58

CJM Waverley

12th 82.8% | 10th 93.8%

Solan, Himachal Pradesh

Aug 2021 - June 2025

Mussoorie, Uttarakhand

Mar 2009 - Mar 2021

CERTIFICATES

Pendo Learning Lab

- Becoming an AI-native Product Manager | [View](#)

NPTEL

- Human Computer Interaction | [View](#)

Microsoft

- Fundamentals of UI/UX Design | [View](#)

Infosys Springboard

- DBMS | [View](#)
- Python Foundation | [View](#)
